

Business Analytics

The data you need to make the business decisions you face. Business Analytics for you and your practice.

Wondering which payers to contract with?

Wish you could track provider productivity?

Curious how your practice performs on KPIs?

CIPROMS Business Analytics gives you access to your billing data and more through dashboards and reports.

Having access to informative, comprehensive, and detailed practice management reports provides you with the information you need for making important practice and billing decisions. From entering into payer contracts to establishing patient collection policies to managing denials, you can count on our business analytics to track key performance indicators that allow you to evaluate your performance—and ours.

Our complete monthly report package covers most industry-recognized KPIs, including accounts receivable status, gross and net collection percentages, charges and payments by payer, contractual adjustments, bad debt write-offs, collection recovery percentages, monthly denials, and more.

“Our partners at CIPROMS can customize and produce valuable reports and metrics that enable us to have significant dialogue with outside parties and assist us with our business operations.”

— Jaemy Hwang, MD, Partner, Southeast Anesthesiologists, PC

trained staff

Our Indianapolis-based team of data analysts can help you design the reports or dashboards you need to drill down on data relevant to your changing business needs.

customized reports

Our chart reconciliation report cross checks and compares billed charges with hospital logs. Other reports assist with payroll, scheduling, contract negotiations, and other management functions.

interactive tools

Our robust business intelligence capabilities allow us to create the customized reports, pivot tables, and dashboards you request to help you analyze data specific to your practice or locale.
