

Anesthesia Billing

**You ease the pain of surgery. Let us ease the pain of medical billing.
Anesthesia Billing, customized for you and your practice.**

Wish you had more data to help you make decisions?

Trying to decide which insurance plans to contract with?

Confused by the new MIPS requirements?

CIPROMS works with anesthesia practices of all sizes and at every stage of the billing cycle.

Our team supports and enhances your practice throughout the billing process, including tools to help you with payer contract negotiations, a whole range of reports to help you make data-driven business decisions, and a proven track record of reporting quality measures through both the claims option and Qualified Clinical Data Registry via the Anesthesia Quality Institute. Plus, our HIPAA-compliant off-site backup system gives you the assurance you need. Other benefits of using CIPROMS Medical Billing:

- Provider enrollment with government and commercial plans of your choice.
- Efficient claims processing through demographic interfaces, certified coding, and trained data entry teams.
- Fee schedule analysis and charge master recommendations.
- Electronic payment remission, posted by line item to patient accounts, and denials worked automatically.
- Follow-up of all unpaid, underpaid, and unacknowledged claims through automated work queues.
- Patient balances move through a statement cycle customized to client specifications.

claims scrubbing

Claims scrubbing technology with rules specific to anesthesia billing allow us to submit a high percentage of clean claims that are paid correctly on first submission.

advanced technology

We use the latest technology at every stage of the billing process, from demographic interfaces to digital coding and uploaded charges to electronic payment remission and lockbox posting.

business analytics

Make strategic business decisions using our report packages and dashboards, including our universal unit payroll processing, OR tracking, and overlapping case reports designed especially for anesthesia.
