

# Emergency Medicine Billing

**You deal with crises every day. Don't let your billing be one of them.  
Emergency Medicine Billing, customized for you and your practice.**

**Are you carrying  
excessive patients  
balances?**

**Trying to decide which  
insurance plans to  
contract with?**

**Wish you had more  
data to help you  
make decisions?**

## CIPROMS works with emergency medicine practices at every stage of the billing cycle.

Our team supports and enhances your practice throughout the billing process, including Medicaid eligibility verification and automated phone calls to help minimize patient balances, tools to help you with payer contract negotiations, and a whole range of reports to help you make data-driven business decisions. Plus, our HIPAA-compliant off-site backup system gives you the assurance you need. Other benefits of using CIPROMS Medical Billing:

- Provider enrollment with government and commercial plans of your choice.
- Efficient claims processing through demographic interfaces, certified coding, and trained data entry teams.
- Fee schedule analysis and charge master recommendations.
- Electronic payment remission, posted by line item to patient accounts, and denials worked automatically.
- Follow-up of all unpaid, underpaid, and unacknowledged claims through automated work queues.
- Patient balances move through a statement cycle customized to client specifications.

### **chart reconciliation**

Don't miss out on billing a single patient you treat through our chart reconciliation process. We match patients we enter with hospital logs to ensure every charge is captured.

### **advanced technology**

We use the latest technology at every stage of the billing process, from demographic interfaces to digital coding and uploaded charges to electronic payment remission and lockbox posting.

### **business analytics**

Make strategic business decisions using our report packages and dashboards, including our E&M Distribution and Documentation Analysis reports designed especially for emergency medicine.
