

Application Service Provider Solutions

**Your staff, your processes, your knowledge. Our software.
Application Service Provider Solutions for you and your practice.**

**Is your billing
software out of
date?**

**Do changing
regulations make you
hesitant to invest?**

**Experiencing too
many system
breakdowns?**

CIPROMS offers ASP Solutions for providers who want high quality functionality without the high cost.

Your staff utilizes our practice management system through HIPAA-compliant remote connections allowing you to take advantage of all the benefits of our proven system. We'll help you set up your database to your own specifications. Plus, we provide the IT support for your work on our system. Other services include:

- A full selection of practice management and billing features, like demographic interfaces, appointment scheduling, layered user access, and user-friendly point-and-click data entry and patient inquiry screens.
- A dedicated database for your practice, which we will help you design and customize according to your needs.
- All system updates, upgrades, and formatting completed by our IT team.
- Your entire database included in our nightly back-up and fully replicated, off-site disaster recovery system.
- Training for you and your team to optimize your use of your fully customized billing system.

experienced staff

As your application service provider, our experienced staff stands ready to help you with system needs you may have, but your business is yours to run as you know best.

automated system

Through our highly automated system, CIPROMS takes care of submitting electronic claims, as well as patient statements and collection notification letters based on a cycle you determine.

business analytics

CIPROMS provides a standard package of monthly reports, as well as access and training for your staff to customize and build additional scheduled or ad hoc reports of your choice.
