

## Provider Enrollment and Credentialing

**Have more important things to read than payer forms?  
Provider Enrollment and Credentialing for you and your practice.**

**Confused about which documents you need for enrollment?**

**Do you often miss deadlines for revalidation or relicensing?**

**Do you have trouble filling out lengthy payer forms?**

### Whether you are a new practice or just new to CIPROMS, we will ensure a smooth transition.

Because enrolling physicians and other healthcare providers with Medicare, Medicaid, and commercial payers is step one in effectively managing the billing cycle. From applying for a National Provider Identifier (NPI) to completing the CAQH profile, from initial set up with payers to relicensing and revalidation, we keep track of which forms need to be completed by whom and when. And we send gentle reminders when forms are overdue. Other services include:

- Providing a list of information and supporting documents needed for enrollment, then we fill out the forms and attach the necessary paperwork. All you do is sign!
- Reminders to providers when their licenses are about to expire and instructions for relicensing.
- Applying for an NPI and initiating all paperwork needed with contracted commercial and government plans when you hire a new physician or allied health provider.
- Completing the necessary paperwork for all Medicare and Medicaid revalidations on your behalf.

#### **trained workforce**

Our team specializes in the highly detailed process of coordinating provider credentials to ensure quick and complete enrollment for maximum reimbursement.

#### **individual attention**

We work with each member of your team individually to ensure successful enrollment with all government and contracted commercial plans.

#### **conveniently packaged**

Our provider enrollment and credentialing services are available in a stand-alone option or conveniently bundled with your full-service medical billing.
